DRUG REGULATORY AFFAIRS & INTELLECTUAL PROPERTY RIGHTS

Offered by-

YSPM's, Yashoda Technical Campus, Faculty of Pharmacy, Wadhe, Satara.

In Association with-

Intellect Institute of Education & Research (IIER)

Approved by –

International Intellectual Property Law Association (IIPLA)

Duration of Course – 3 Month

Other Details:-

- Drug Regulatory Affairs Course provides practical knowledge and hands on training on drug regulation and registration process.

- It is a well-known fact that the development of advanced medicines and drugs has been playing a vital role in the healthcare services and delivery that has made the entire healthcare industry to grow at a rising pace.

- While the Indian pharmaceutical industry is emerging as one of the fast-growing markets in the global scale, it is also expanding its export market across the world.

- As a result, there need to be proper regulations for medicines to ensure the quality, safety, and efficacy of the drugs. Even a smallest of the mistake can end up recalling the product, leaving several millions at loss for the company.

- This is why regulatory affairs in the pharma industry has a crucial role to play in all phases of drug development, drug approval, and marketing, in compliance with the norms, regulations, and

guidelines. Regulatory Affairs is highly demanding profession and in future also there will be high demand of qualified Regulatory Professionals.

- Intellectual property rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property.

- IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation.

- There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application.

- IPR is prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity. Each industry should evolve its own IPR policies, management style, strategies, and so on depending on its area of specialty.

- Pharmaceutical industry currently has an evolving IPR strategy requiring a better focus and approach in the coming era.
